FLEXIBLE PACKAGING AUTOMATION

# Pick or pack, we've got your back

Whatever your process,  
industry, or product, our  
solutions fit like a glove.

WHY AUTOMATED FIT-TO-SIZE PACKAGING?

# The rise of fit-to-size

Today's biggest challenges driving packaging automation:

## Labor

Do the work of 20 packers with one machine (no coffee breaks)

## Throughput

Pack up to 1,100 boxes per hour and ship faster than ever

## Freight/DIM

Cut volume, materials, and freight costs, avoid DIM charges

CVP IMPACK AUTOMATED PACKAGING SOLUTION

# Create a right-sized box every 7 seconds

**CVP Impack measures, constructs, tapes, weighs, and labels each order.**

Box anything from a pair of headphones to a sleeping bag roll, and all sizes in between. This inline solution fully integrates with your warehouse management system to help you flexibly meet demands and future growth.

---

Single and multi-items

---

Pack any shape and texture

---

Scale with peaks and growth

Sparck Technologies — Packaging automation

# CVP Impack

- 01 **One, two, or three corrugate feeders** use agnostic fan-fold material available in widths of 50, 60, 80, and 100 cm, either individually or in combination.
- 02 **Single, dual or automated induct station** supports high operator and machine productivity levels.
- 03 **Scanner captures 3D image** of each unique order item or items to determine the minimum box size required.
- 04 **On demand box construction** allows for a fit-to-size box in a wide range of sizes.

- 05 **Box taped with 100% security** using tape for easy open, recycling, or returns, improving the customer experience.
- 06 **Order weight verification** optimizes rate shopping via an in-line scale, assuring accurate weight and measurements.
- 07 **Carrier compliant labels** are created and applied to ensure accurate delivery.

CVP EVEREST AUTOMATED PACKAGING SOLUTION

# Or step it up to every 3 seconds

**CVP Everest measures, constructs, glues, weighs, and labels each order.**

This supercharged solution will keep up with your high volume fulfilment needs while supporting those ever changing peaks. By creating the smallest box necessary, you will improve the customer experience with sustainable packaging.

# CVP Everest

- 01 **One, two, or three corrugate feeders** use agnostic fan-fold material available in widths of 50, 60, 80, and 100 cm, either individually or in combination.
- 02 **Single, dual or automated induct station** supports high operator and machine productivity levels.
- 03 **Scanner captures 3D image** of each unique order item or items to determine the minimum box size required.
- 04 **Case erector** builds a fit-to-size box bottom and allows for a wide range of sizes with a minimal box height of 28 mm.
- 05 **Two lid applicators** work in parallel to fully seal each custom box with a tear strip for easy open and returns.
- 06 **Order weight verification** optimizes rate shopping via an in-line scale, assuring accurate weight and measurements
- 07 **Carrier compliant labels** are created and applied to ensure accurate delivery. High-speed print and apply systems with 4,500 labels per roll.

SMART PACKAGING FOR EVERY INDUSTRY

# Technology by Sparck, flexibility for your business

Sparck's machines are productivity powerhouses engineered to deliver maximum impact across industries, custom-tailored to your needs.

---

**Handles a wide range of order weights**

(up to 30 kg / 66 lbs)

---

**Supports pick-to-box and pick-then-pack operations**

---

**Consistent box dimensions for bulk or batch orders**

---

**Agile packaging automation for every industry**

GLOBAL SUPPORT, LOCAL EXPERTISE

# Best service in the business

We are with you every step of the way. 24/7 monitoring and dedicated service engineers keep your process running at peak performance.

## Stacks of benefits:

- 24/7 remote monitoring
- Global service network
- On-site & virtual support
- Tailored maintenance plans
- 5 days to install the machine
- New operators up to speed in 1 hour
- 90% of service calls solved remotely
- Technology and Innovation Centers, and Sparck Academy for training
